REDMOND BIKE PARK

REDMOND, WASHINGTON

Redmond Bike Park is a project of the City of Redmond, Parks and Recreation Department. The goals of the project are to provide local riders of all ages and skill levels with a facility designed and built specifically for practicing and developing riding skills in a safe and controlled environment.

Background

The City is working with community members to formalize the use of City property south of Hartman Park as a bike skills park. The site has been used for 15 to 20 years as an unofficial dirt jump park for BMX and mountain bikers. The following photos show some of the existing features at the park site.

A jump entering a straigt-away with rollers and a berm

Steps

The City hired a consultant, Hilride Progression Development, to design the park based on community input. The project will be constructed by volunteers from the community and City of Redmond Park and Recreation staff. Hilride will provide training to the builders and check in periodically to ensure the project is progressing as planned.

Project History

May 2009 – City met with community members to discuss the use of the site

June 2009 –Public meeting to discuss how the bike park might be redeveloped

July 2009 – City hosted field trips to tour bike parks in region & meet builders

August 2009 – A work party was held at the site to repair jumps and fill in holes

Fall 2009 – City conducted hiring process for consultant

Winter 2009/10 – Consultant evaluated alternative sites for the bike park on Education Hill and met with City staff to review

February 2010 – Public meeting to discuss site selection

Council approved of existing site as the final site and of the name of the park, Redmond Bike Park

March 2010 –Design Workshop held to gather ideas about park design

May 2010 –Public meeting to discuss preliminary design

Project Schedule

June 2010 – Hilride developed more alternatives and public meeting scheduled for June 30 to discuss

July 2010 – Hilride will develop final design

August/September 2010 – Obtain permits

Fall or Winter 2010 – Construction anticipated beginning
