NEW REQUIREMENTS FOR BACKFLOW ASSEMBLY TESTERS (BATs)

The Washington State Department of Health has adopted a new policy for BATs. As of January 1, 2013, testers are required to be certified to test assemblies using the University of Southern California 10th Edition Field Test Procedures. The previous 9th Edition Procedures cannot be accepted by the City of Redmond after January 1, 2013.

All of the companies on the City of Redmond preferred list have met this requirement. If you hire a company that is not listed on our page, make sure to verify that they are certified to use the USC 10th Edition Field Test Procedures. If you would like to verify for yourself, please call or email Kathy Caldwell at the Water Quality office.
