SUBJECT: STAFF REPORT: REDMOND CODE REWRITE: DESIGN STANDARDS, DEVELOPMENT STANDARDS 2, AND DEVELOPMENT STANDARDS 3 PACKAGES (L090380)

In October and November 2010 the Code Rewrite Commission completed review of three packages of the Redmond Code Rewrite: Design Standards; Development Standards 2; and Development Standards 3. The Code Rewrite Commission's Reports on these packages were delivered to Council boxes on October 29, 2010 (Design Standards), November 5, 2010 (Development Standards 2), and December 3, 2010 (Development Standards 3).

REQUESTED DIRECTION

On December 7, 2010, staff will ask if there are particular issues Council members would like to discuss at the December 14, 2010, study session or questions on either of these packages to which staff can prepare responses. A key question for Council members to consider while reviewing these packages is whether the recommended drafts support the project mission statement and principles (included as Attachment A).

A second study session (if needed) is scheduled for January 11, 2011. An action of the Council to "resolve to adopt" is scheduled for February 1, 2011.

OVERVIEW AND BACKGROUND

The 2009-2011 Code Rewrite project commenced in January 2009 and will continue through 2010 with the goal of final adoption of a new zoning code by spring 2011. Phase I of the project included an evaluation of the existing RCDG, determined the scope of the rewrite, and developed a mission statement and four sets of guiding principles for the rewrite, including organization, regulations, permit review procedures, and zoning code update and adoption process.

The existing Redmond Community Development Guide (RCDG) has been divided into topic-based packages of code sections. Each rewritten section of code must be consistent with the mission statement and sets of guiding principles, as noted in the staff report for each package (provided as an exhibit to the Code Rewrite Commission Report).

Mayor Marchione and City Council

RE: STAFF REPORT: DESIGN STANDARDS, DEVELOPMENT STANDARDS 2, AND DEVELOPMENT
STANDARDS 3 PACKAGES (L090380)

December 7 2010

Page 2

The Design Standards package includes design standards relating to site and building development. The Development Standards 2 package includes regulations pertaining to high-capacity transit corridor preservation, historic and archeological resources, parking, transfer of development rights, transition overlay areas, and transit-supportive development. The Development Standards 3 package includes regulations pertaining to limitations on external effects of uses, hazardous liquid pipelines, open space and recreation, outdoor storage and service areas, garbage and recycling standards, landscaping and signs.

The Code Rewrite Commission Reports on each of these packages summarize the key conclusions and recommendations of the Commission, as well as testimony received during the public hearings. Please contact Steven Fischer at 425-556-2432 with questions on the Design Standards; Gary Lee at 425-556-2418 with questions regarding Development Standards 2; and Thara Johnson at 425-556-2470 regarding Development Standards 3.

ATTACHMENTS

Attachment A: Redmond Code Rewrite Mission Statement and Principles

ATTACHMENT A

RCDG Rewrite Mission and Principles

Create a zoning code that:

- Improves clarity, conciseness, predictability and usability for residents, development professionals and the business community;
- Maintains the integrity of code concepts adopted over time by the City Council while utilizing new ideas where appropriate to achieve these concepts; and
- Implements clearly and effectively the goals, visions and policies of the Comprehensive Plan.

Principles for Code Organization

1. Group and consolidate regulations in a simple, logical, and efficient structure, and provide clear references to relevant code sections when they are separated from core information.
2. Provide visual aids to guide the user and to explain the relationship between various sections of the document.
3. Place basic regulations in obvious locations, outside of footnotes and other easy-to-miss places.
4. Separate definitions, procedures, and regulations.
5. Clearly identify when city-wide regulations apply and when unique regulations apply.
6. Reduce complexity and eliminate excessive detail to make the code easier to use, navigate, and search.

Principles for Code Regulations

1. Carry out the Comprehensive Plan with a clear connection to adopted policies.
2. Convey expectations of quality clearly and succinctly with illustrations and examples.
3. Identify opportunities to promote sustainable development practices.
4. Provide flexibility and predictability within defined limits as a method of meeting the intent of regulations.
5. Use easily-understood language, with defined legal and technical terms where useful. Avoid multiple definitions of terms.
6. Clearly convey maximum development potential.

Principles for Permit Review Procedures

1. Incorporate legal review into the early stages of code revision.

2. Provide early notice, and opportunities for timely input corresponding to the land use action proposed.
3. Ensure that decision-making timelines meet or are quicker than statutory requirements, without compromising opportunities for public input.
4. Use an administrative review process for certain permits where there are clear approval criteria that ensure the City's goals and visions are being met.
5. Describe the code's procedures clearly and succinctly. Use brochures and online information to help users understand the review processes.
6. Consolidate multiple permits, related to a proposal to make the process more understandable and accessible.

Principles for Zoning Code Update and Adoption

1. Seek input from user groups and the larger community by ensuring clear communication, open conversation, and providing a variety of public involvement opportunities and formats.
2. Document public involvement and findings as decisions are made to provide transparency and accountability.
3. Ensure a clear understanding of the project scope as being limited to code rewrites that are consistent with the Comprehensive Plan.
4. Group formal consideration of regulations into similar subjects to allow interested parties to participate in the changes most relevant to them.
5. Commit to a process for code development, public review and decision-making that will enable the City Council to adopt the zoning code rewrite during the first quarter of 2011.
