MEETING SUMMARY

Redmond Pedestrian and Bicycle Advisory Committee

June 10, 2019 6:30 PM City Hall

ATTENDEES: Shelly Bowman, Lizette Hedberg, Glenn Eades, Bertha Eades, Lorraine Josifek, Arnie Tomac, Gregg Gottgetreu

CITY STAFF: Peter Dane

MEETING SUMMARY

1. **Marymoor Village Design Guidelines**: PBAC reviewed high level concepts resulting from draft updates to the Marymoor Village Design Guidelines, including proposals to incorporate pedestrian ways and/or woonerfs to create a smaller street grid at locations with large blocks, concentrating retail within the core of the neighborhood, and adding landscaping to the perimeter trail. Members supported all of the proposals in the hopes of:
   - Creating a livable, vibrant neighborhood via a dense network of pedestrian connections
   - Implementing a concentrated retail area that is sized to be successful given the number of patrons that will live/work in the area and nearby retail such as Whole Foods
   - Building a trail that can help make a unique identity for Marymoor Village

2. **PBAC Summer Field Trip**: Members supported holding the Summer field trip on August 12 from City Hall to West Lake Sammamish Parkway. This will review the test section of profiled edge line that was installed based on PBAC support at a meeting in Fall of 2016. The goal of this implementation was to discourage drivers from errantly entering the bicycle lane by adding a tactile queue while, at the same time, avoiding a potential collision concern for bicyclists. If members like the profiled edge line then it could potentially be rolled out more broadly.

3. **Derby Days**: Members agreed to volunteer to host a booth at Derby Days with the Parks & Trails Commission. Volunteers will ask participants where they would like to be able to
bicycle or see a trail in the future and will hand out materials such as the existing bicycle and trail map.

4. Updates:
   • Washington Legislative Session
     o The State passed several bills that revise laws related to pedestrians and bicycles. Highlights include a revised definition for scooters and the strengthening of the vulnerable user law.
   • Volunteer trail maintenance request
     o Gregg Gottgetreu provided background on his volunteer work over the years to keep trails such as the Puget Sound Energy Trail free of leaves. He asked if PBAC would be supportive of such a program. Members were interested in the concept if the Parks Department is able to implement it.
