ENVIRONMENTAL CHECKLIST

PROJECT ACTION

(Revised March 2018)

Purpose of the Checklist:

The State Environmental Policy Act (SEPA), chapter 43.21C RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the City of Redmond identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

Instructions for Applicants:

This environmental checklist asks you to describe some basic information about your proposal. Governmental agencies use this checklist to determine whether the environmental impacts of your proposal are significant, requiring preparation of an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "do not know" or "does not apply" and indicate the reason why the question "does not apply". It is not adequate to submit responses such as "N/A" or "does not apply"; without providing a reason why the specific section does not relate or cause an impact. Complete answers to the questions now may avoid unnecessary delays later. If you need more space to write answers attach them and reference the question number.

Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the City can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. When you submit this checklist the City may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

<p>c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, mulch)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.</p> <p>Based on the information obtained from our explorations, the soil profile generally consists of fill at the ground surface that is underlain by native silt, sand, and gravel. The soil at the site is mapped as Pleistocene glacial outwash (Fraser-age) (DNR, 2018). Recessional outwash deposits typically include sand, gravel, and cobbles with varying amounts of silt. Recessional outwash deposits generally overlie glacially consolidated soil (Minard and Booth, 1988). See geotechnical report.</p>	<p>CZ (RZC 21.64 Critical Areas Clearing and Grading Regulations)</p>
<p>d. Are there surface indications or history of unstable soils in the immediate vicinity? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If yes, describe.</p> <p>Yes, Mapping shows a small surficial landslide along the east slope. Other than this, the area does not have unstable soils in the immediate vicinity. See geotechnical report.</p>	<p>CZ (RZC 21.64 Critical Areas' Clearing and Grading Regulations)</p>
<p>e. Describe the purpose, type, total area, location and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.</p> <p>The purpose of grading will be to create level building pads, road, and ensure proper site drainage. This site will export material to the adjacent Cadman property. The site will cut approximately 6' off of the site plus the berms that were added on the south and west, +/- 225,480 CY of cut and +/- 2,230 CY of fill.</p>	<p>CZ (RZC 21.64 Critical Areas' Clearing and Grading Regulations)</p>
<p>f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.</p> <p>Erosion could occur as a result of denuded soil during and immediately following storm events during the construction cycle of the plat. Appropriate measures will be used to protect the surrounding area.</p>	<p>CZ (RZC 21.64 Critical Areas Clearing and Grading Regulations)</p>
<p>g. About what percentage of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?</p> <p>The site will be covered with approximately 55% impervious surfaces after project construction.</p>	<p>CZ (Max. Impervious surface 70% per RZC 21.13.020)RZC 21.64 Critical Areas Clearing and Grading Regulations)</p>

To Be Completed By Applicant	Evaluation for Agency Use Only
<p>h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.</p> <p>A TESC plan will be prepared and implemented prior to commencement of construction activities. During construction, erosion control measures may include the following: siltation fence and silt ponds and other measurements required by the City.</p>	<p>CZ (RZC 21.64 Critical Areas Clearing and Grading Regulations)</p>
<p>i. Does the landfill or excavation involve over 100 cubic yards throughout the lifetime of the project?</p> <p>Yes, this project will excavate or landfill over 100 cubic yards.</p>	<p>CZ (RZC 21.64 Critical Areas Clearing and Grading Regulations)</p>
<p>2. Air</p>	
<p>a. What types of emissions to the air (i . e. dust, automobile, odors, industrial wood smoke, and greenhouse gases) would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.</p> <p>During construction there will be increased exhaust and dust particle emissions. After construction, the principle source of emissions will be from automobile traffic, lawn equipment, and other sources typical of a residential neighborhood.</p>	<p>CZ (Air Operations Permits; Puget Sound Air Quality Agency)</p>
<p>b. Are there any off-site sources of emissions or odor that may affect your proposal? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If yes, generally describe.</p> <p>Yes, there is a chance that off-site sources of emissions or odor may affect this proposal. The adjacent property to the north is an active mining operation with machinery that exhausts diesel fumes. There is a chance that the odor from that exhaust will come onto this project.</p>	<p>CZ (Air Operations Permits; Puget Sound Air Quality Agency)</p>
<p>c. Proposed measures to reduce or control emissions or other impacts to air, if any.</p> <p>Construction impacts will not be significant and can be controlled by several methods: watering or using dust suppressants on areas of exposed soils, washing truck wheels before leaving the site, and maintaining gravel construction entrances.</p>	<p>CZ (Air Operations Permits; Puget Sound Air Quality Agency)</p>

Note approximate distance between surface waters and any construction, fill, etc.</p> <p>CZ Wetland buffer averaging will be applied, the minimum buffer distance from the wetland will be 110' (RZC 21.64 Critical Areas, RMC 13.06, Stormwater Management Code & Stormwater Technical Notebook)</p> <p>3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.</p> <p>There will be no fill or dredge material placed in or removed from surface water or wetlands on our project.</p> <p>4. Will the proposal require surface water withdrawals or diversions? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No Will the proposal require permanent dewatering or temporary dewatering? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If yes, give general description, purpose, and approximate quantities if known.</p>	<p>CZ Wetland and stream are off-site (RZC 21.64 Critical Areas, RMC 13.06, Stormwater Management Code & Stormwater Technical Notebook)</p> <p>CZ (RZC 21.64 Critical Areas, RMC 13.06, Stormwater Management Code & Stormwater Technical Notebook)</p> <p>CZ (RZC 21.64 Critical Areas, RMC 13.06, Stormwater Management Code & Stormwater Technical Notebook)</p> <p>CZ (RZC 21.64 Critical Areas, RMC 13.06, Stormwater Management Code & Stormwater Technical Notebook)</p>
