6. Judy Fani, Interim Manager, Long Range Planning, led a discussion of the current comprehensive plan docketing process to identify which steps may merit further evaluation to produce a more predictable and efficient process, and is also compliant with the Growth Management Act (GMA). Ideally, a new process would provide clearer timeframes and expectations to applicants, as well as residents who monitor proposed comprehensive plan amendments. The Commissioners identified the following areas for potential process improvements:
   • Consider language that would allow Council to include non-emergency city-initiated amendments on an already-approved docket. There is an existing policy that allows Council to add city-initiated amendments for emergencies only.
   • Consider revisiting the minimum threshold criteria to clarify terms including time, timely, consistent, concurrent.
   • In developing the docket, consider city priorities, and staff capacity to complete proposed amendments within the docket year.
   • Consolidate items for public hearing to strengthen efficiency.
   • Redesign the process to include a predictable application period/schedule.
• Restructure the process to achieve a cumulative review of approved proposals.
• Reduce number of carryover items.
• Concurrent review of proposals.
• Truly amend the comprehensive plan no more than once per year.

Over the coming months, before returning with a Technical Committee recommendation, Ms. Fani will work with these suggestions and also prepare a comparison chart that shows the comprehensive plan amendment process used by nearby jurisdictions.
