Hi Mr. Lee,

I'm Suzanne Malinowski and I live on 156th Ave NE in Redmond. I asked some questions during the public hearing this evening and I have a follow up from the public hearing discussion.

The trees that are currently in place provide some noise buffer from the highway traffic on SR-520. Do the noise mitigation studies factor in the impact of the reduction of the tree buffer on highway noise and the additional noise from the light rail?

Thanks so much!

- Suzanne Malinowski
