

## City of Redmond Stewardship Highlights: 2020

### Green Redmond Partnership

The City of Redmond works through the Green Redmond Partnership and other partners to build a sustainable network of healthy urban green spaces for the benefit and enjoyment of our entire city. Green Redmond Partnership, along with its major partner, Forterra, is committed to restoring all 1,035 acres of Redmond's forested parkland into active management. To accomplish this mission requires the dedication and hard work of many volunteers. In 2020, Green Redmond Partnership sponsored eight work parties/community events before COVID-19 forced the programming to discontinue. Most of these events were focused on removing invasive plants and planting native plants.

Key park/open space restoration events hosted by Green Redmond Partnership took place on the following dates:

February 2 (two separate events)  
February 16 (two separate events)  
February 19  
February 29  
March 1 (two separate events)

### Other Restoration Events Sponsored by the City and its Partners

November 6 (with EarthCorps) at Farrel-McWhirter Park (two separate events)

### Other Stewardship Opportunities

City of Redmond supplied the Hazelwood HOA with tools and native plants for a Native Growth Protection Easement (NGPE) Enhancement Workparty.
