Recycle, compost and reduce waste

Did you know apartments and condos are eligible for free food scraps composting service? Learn more about composting service, and find answers to all your recycling questions at redmond.gov/recycling.

Safely dispose of fats, oils, and grease (FOG)

Never pour FOG down the sink. They will cool and congeal down the line, sticking to pipes and causing sewer overflows. Instead “cool it, can it, and trash it!”

Don't flush trouble

Avoid clogged pipes – only throw toilet paper in the toilet. Even if they are labeled “flushable,” all other products such as wipes, feminine products, and cotton balls do not break down and cause expensive repairs.

Always pick up pet waste

Did you know that pet waste contains harmful bacteria such as E. coli and salmonella? Bacteria can be washed into storm drains after rainfall and then flow untreated into rivers, lakes, and streams. Follow these three easy steps to keep our waterways clean:

1. Scoop pet waste – in trails, parks, and where you live
2. Bag it – use a plastic dog waste bag or grocery bag
3. Put it in the trash – a garbage can is the only safe place for pet waste regardless of the bag

Properly dispose of hazardous waste

Some items such as gasoline, pesticides, oil-based paint, and fluorescent bulbs are considered hazardous and cannot go in your garbage. Improper disposal of such items is a risk to our natural resources and our drinking water. Most household hazardous waste can be disposed of for free through King County.
