Resiliency:

Ensuring that the community, as a whole, is prepared for, able to adapt to, and can recover effectively from disruptive conditions.

As we plan for the future of Redmond and update the Redmond Comprehensive Plan, one of the main themes is **Resiliency**.

redmond.gov/Redmond2050

Intent

- City processes and procedures have the flexibility to pivot and respond quickly to the unpredictable and react/act when needed, including preparing, educating, mitigating, adapting, and managing risk.
- Identifying essential services and vulnerable systems and populations prior to and during emergencies.
- Having multiple paths and backup systems to achieve community goals, with outcomes and vision more important than how that is accomplished.
- Designing and building our community for longevity and flexibility from the start.
- Harnessing information and communications technology in service of the above objectives.

Toolkit for Reviewing Comprehensive Plan Elements and Policies

Staff will review each chapter and policy in the Comprehensive Plan and all new proposed policies to ensure that we are supporting the implementation of this theme. The review will focus on:

- Is the element/policy focused on the communities desired outcomes and vision instead of specific techniques or tools (support a diversity of tools or approaches)?
- Are essential services that are needed to respond to and recover from disruptive conditions clearly identified in the element?
- Does the policy identify and is it responsive to the needs of vulnerable populations during and after disruptive conditions?
- Does this policy support adaptability, diversity, and/or redundancy (in infrastructure, the economy, etc.)?
