

King County PSERN Education Hill - Survey

King County Puget Sound Emergency Radio Network (PSERN) approached the City of Redmond about the possibility of placing a 170' emergency communications tower and equipment on the public works/water tank property located at 10365 172nd Ave. NE in the Education Hill neighborhood. Before making a decision, the City of Redmond requested a survey to assist in determining if the neighborhood would be supportive of an emergency communications facility being placed on the public works/water tank property.

A self-addressed stamped envelope has been provided. Please mail the completed survey back as soon as possible. **Please return the survey by July 25th.** (Please note survey responses are anonymous unless contact information is provided).

- 1) Have you heard or are you aware of the PSERN levee that was passed by King County voters on April 28th, 2015, for funding and upgrading the current emergency radio system? Please mark one (1) box below.

Yes
 No

- 2) Would you be supportive of a PSERN emergency communications tower and equipment to provide expanded emergency communications, as depicted and described in this mailer, being installed at the property located at 10365 172nd Ave. NE?

Yes, Supportive
 No, Not Supportive
 Unsure

Please provide comments:

To me it seems like a reasonable location. The height does not particularly mar the landscape. (I walked around to look at the balloon from different angles.) My questions about the installation job are on the next page. I would hope for as little impact as possible on the land/trees/wifelife habitat and for mitigation of damage as a final and careful step.

- 3) Do you like the proposed design (170' monopole) as seen in the provided photo simulations and demonstrated at the scheduled balloon test on **Saturday, July 16th between 9 am and 11 am?**

- Yes, Supportive
 No, Not Supportive
 Unsure

Please provide comments: There was little ground wind July 16, but enough upper level wind so the balloon line was slanted. I'm not sure how much this affected the balloon height. It didn't seem to be as high as in your photos - which were v. helpful.

- 4) Please outline any specific questions and/or concerns that you have about the proposed PSERN emergency communications installation:

Please provide comments: My main concern has to do with the ground footprint of this installation. What does the white tape on the trees mean? Only 2 trees are orange-taped. Are you only removing 2 trees? What is the size of the pad(s)? How much area will be covered i.e. cemented or asphalted? Can't you access from the water tower property rather than cut trees + lay rock etc. for another driveway? I look forward to hearing back from you on these questions. Thank you for being thorough + providing info. in detail.

- 5) Please provide contact information. **(Please note survey responses are anonymous unless contact information is provided)**

Re: King County PSERN - Education Hill - Survey

August 11, 2016

Dear Margaret:

Thank you so much for taking the time to complete the survey regarding the proposed King County Puget Sound Emergency Radio Network (PSERN) emergency communications facility for Education Hill located at 10365 172nd Avenue NE Redmond, WA.

The returned survey had a few questions/concerns outlined. The questions and concerns were as follows:

Question #1

Footprint of site (impervious surface).

Response #1

The proposed new impervious surface amount is approximately 3,640 square feet.

Question #2

White and orange tape on trees?

Response #2

The tape on the trees is from the arborist. The City of Redmond requires that a certified arborist review the trees on the property within 50' of the proposed project and provide a report. The project will require the removal of ten (10) healthy trees. Please let me know if you would like a copy of the arborist report.

Question #3

Can you access the site from the water tank driveway?

Response #3

Access will not be allowed from the water tank driveway. Access will be from a new driveway off of 172nd Avenue NE.

Please let me know if you have any other questions and/or concerns about the project.

Respectfully,

Sarah Telschow (King County PSERN Agent/Representative)

Re: King County PSERN - Education Hill - Survey

August 11, 2016

Dear Dennis:

Thank you so much for taking the time to complete the survey regarding the proposed King County Puget Sound Emergency Radio Network (PSERN) emergency communications facility for Education Hill located at 10365 172nd Avenue NE Redmond, WA.

The returned survey had a few questions/concerns outlined. The questions and concerns were as follows:

Question #1

What other options are there?

Response #1

Please see the attached Site Justification Letter which outlines other sites that King County PSERN reviewed in the area.

Question #2

How often does the generator run?

Response #2

The proposed 50kw emergency back-up generator is to provide power to the facility during power outages. Other than power outages, the generator will typically run once per week during daytime hours for maintenance and testing purposes only. The proposed equipment at this site location is required to meet local noise regulations for both daytime and nighttime noise levels. Please let me know if you would like a copy of the Acoustical Report for the project.

Question #3

What about tank spills?

Response #3

The proposed on-site diesel storage tank is to power the emergency back-up generator during power outages. It is essential that the emergency communication facility have power during extended power outages and emergencies in order to provide critical communication to emergency responders. The diesel storage tank must adhere to stringent fire codes and regulations regarding safety and spill prevention.

Question #4

Night lights and how many?

Response #4

The proposed King County PSERN emergency communication facility is not required to have lighting per the Federal Aviation Administration (FAA) determination. Please let me know if you would like a copy of the FAA determination.

Please let me know if you have any other questions and/or concerns about the project.

King County PSERN Education Hill - Survey

King County Puget Sound Emergency Radio Network (PSERN) approached the City of Redmond about the possibility of placing a 170' emergency communications tower and equipment on the public works/water tank property located at 10365 172nd Ave. NE in the Education Hill neighborhood. Before making a decision, the City of Redmond requested a survey to assist in determining if the neighborhood would be supportive of an emergency communications facility being placed on the public works/water tank property.

A self-addressed stamped envelope has been provided. Please mail the completed survey back as soon as possible. **Please return the survey by July 25th.** (Please note survey responses are anonymous unless contact information is provided).

- 1) Have you heard or are you aware of the PSERN levee that was passed by King County voters on April 28th, 2015, for funding and upgrading the current emergency radio system? Please mark one (1) box below.

- Yes
 No

- 2) Would you be supportive of a PSERN emergency communications tower and equipment to provide expanded emergency communications, as depicted and described in this mailer, being installed at the property located at 10365 172nd Ave. NE?

- Yes, Supportive
 No, Not Supportive
 Unsure

Please provide comments:

3) Do you like the proposed design (170' monopole) as seen in the provided photo simulations and demonstrated at the scheduled balloon test on **Saturday, July 16th between 9 am and 11 am?**

- Yes, Supportive

Re: King County PSERN - Education Hill - Survey

August 11, 2016

Dear Carol:

Thank you so much for taking the time to complete the survey regarding the proposed King County Puget Sound Emergency Radio Network (PSERN) emergency communications facility for Education Hill located at 10365 172nd Avenue NE Redmond, WA.

The returned survey had a few questions/concerns outlined. The questions and concerns were as follows:

Concern #1

Impact on birds and other wildlife.

Response #1

The proposed King County PSERN emergency communication facility will not pose any impacts to birds and/or other wildlife. This King County PSERN facility will add reliability and allow improved critical emergency radio communications to reach and coordinate with emergency responders.

Concern #2

Noise

Response #2

The proposed equipment at this site location is required to meet local residential noise regulations for both daytime and nighttime noise levels. The proposed emergency back-up generator is to provide power to the facility during power outages. Other than power outages, the generator will typically run once per week during daytime hours for maintenance and testing purposes only.

Construction will take place during the allowed hours of Monday through Friday: 7 am to 7 pm, Saturday: 9 am to 6 pm, and Sunday and/or Legal Holidays: Prohibited

Concern #3

Traffic

Response #3

There will be minimal traffic associated with the construction phase. These facilities are unmanned and do not require additional activity or traffic after the initial construction phase except for routine maintenance checks.

Please let me know if you have any other questions and/or concerns about the project.

Respectfully,

Sarah Telschow (King County PSERN Agent/Representative)

Re: King County PSERN - Education Hill - Survey

August 11, 2016

Dear Brenda:

Thank you so much for taking the time to complete the survey regarding the proposed King County Puget Sound Emergency Radio Network (PSERN) emergency communications facility for Education Hill located at 10365 172nd Avenue NE Redmond, WA.

The returned survey had a few questions/concerns outlined. The questions and concerns were as follows:

Concern #1

Full disclosure of health risks associated with this installation.

Response #1

The proposed King County PSERN emergency communication facility will not pose any health risks to the community. This King County PSERN facility provides reliability and allows for improved critical emergency radio communications to reach and coordinate with emergency responders. A detailed report regarding the specific emissions from this facility is available. Please let me know if you would like me to e-mail and/or mail you a copy of the report.

Concern #2

How this will impact surrounding children, youth and families?

Response #2

The proposed facility is located as far as possible from the surrounding schools and neighborhoods. The proposed facility has been located and designed to provide the best possible emergency radio coverage to a large portion of Redmond and surrounding communities. This area is underserved by the current emergency radio network and is a known hazard to our first responders.

Please let me know if you have any other questions and/or concerns about the project.

Respectfully,

Sarah Telschow (King County PSERN Agent/Representative)

P. Weaver
17022 NE 104th Court
Redmond, WA 98052

August 15, 2016

Dear P. Weaver:

Thank you so much for taking the time to complete the survey regarding the proposed King County Puget Sound Emergency Radio Network (PSERN) emergency communications facility for Education Hill located at 10365 172nd Avenue NE Redmond, WA.

The returned survey had a few questions/concerns outlined. The questions and concerns were as follows:

Concern #1

The proposed facility should be farther out more in rural areas not in a close neighborhood.

Response #1

The proposed facility has been located and designed to provide the best possible emergency radio coverage to a large portion of Redmond and surrounding communities. This area is underserved by the current emergency radio network and is a known hazard to our first responders.

Concern #2

170 feet is too tall.

Response #2

The proposal consists of constructing a monopole to a height one hundred seventy feet (170') to effectively transmit and receive emergency radio communications. The height of the facility needs to be 170' in order to establish a direct line of sight to connecting infrastructure. The emergency radio network primarily relies on point-to-point microwave antenna connections making the system reliable and operational during emergencies and/or disasters.

Concern #3

The proposed facility would affect property values.

Response #3

King County PSERN has located and designed this facility to have the least impact possible on the neighborhood. Similar installations have been studied over the past 20 years regarding towers associated with cellular telephone antennas. There has been no finding that these installations have a negative impact on property values and will not decrease home values.

A detailed property valuation report has been completed. Please let me know if you would like a copy of that report.

Concern #4

The proposed facility is for Seattle and not the Eastside.

Response #4

The Education Hill emergency radio site is to provide critical emergency communications coverage for Redmond and surrounding areas. Without the Education Hill site, King County will not be able to provide the level of emergency radio coverage to the first responders that rely on communication in the field in the greater Redmond area.

Please let me know if you have any other questions and/or concerns about the project.

Respectfully,

Sarah Telschow (King County PSERN Agent/Representative)
Odelia Pacific Corporation

King County PSERN Education Hill - Survey

King County Puget Sound Emergency Radio Network (PSERN) approached the City of Redmond about the possibility of placing a 170' emergency communications tower and equipment on the public works/water tank property located at 10365 172nd Ave. NE in the Education Hill neighborhood. Before making a decision, the City of Redmond requested a survey to assist in determining if the neighborhood would be supportive of an emergency communications facility being placed on the public works/water tank property.

A self-addressed stamped envelope has been provided. Please mail the completed survey back as soon as possible. **Please return the survey by July 25th.** (Please note survey responses are anonymous unless contact information is provided).

- 1) Have you heard or are you aware of the PSERN levee that was passed by King County voters on April 28th, 2015, for funding and upgrading the current emergency radio system? Please mark one (1) box below.

- Yes
 No

- 2) Would you be supportive of a PSERN emergency communications tower and equipment to provide expanded emergency communications, as depicted and described in this mailer, being installed at the property located at 10365 172nd Ave. NE?

- Yes, Supportive
 No, Not Supportive
 Unsure

Please provide comments:

1. Will cause health hazards. Education Hill has lots of kids - why expose them to unknown & unnecessary radio waves?
2. Will make the hill look ugly

3) Do you like the proposed design (170' monopole) as seen in the provided photo simulations and demonstrated at the scheduled balloon test on **Saturday, July 16th between 9 am and 11 am?**

- Yes, Supportive
- No, Not Supportive
- Unsure

Please provide comments:

4) Please outline any specific questions and/or concerns that you have about the proposed PSERN emergency communications installation:

Please provide comments: I am aware of research showing ~~Every~~ that the emissions are below that by FCC. But with already so many radio waves from cell phone towers, why add more? I do not want to risk my kids health for unnecessary city expenditures.

5) Please provide contact information. **(Please note survey responses are anonymous unless contact information is provided)**

Re: King County PSERN - Education Hill - Survey

August 11, 2016

Dear Rashim:

Thank you so much for taking the time to complete the survey regarding the proposed King County Puget Sound Emergency Radio Network (PSERN) emergency communications facility for Education Hill located at 10365 172nd Avenue NE Redmond, WA.

The returned survey had a few questions/concerns outlined. The questions and concerns were as follows:

Concern #1

Will cause health hazards. Why expose kids to unknown/unnecessary radio waves.

Response #1

The proposed King County PSERN emergency communication facility will not pose any health risks to the community. This King County PSERN facility adds reliability and allows for improved critical emergency radio communications to reach and coordinate with emergency responders. A detailed report regarding the specific emissions from this facility is available. Please let me know if you would like me to e-mail and/or mail you a copy of the report.

Concern #2

Will make the hill look ugly.

Response #2

The proposed facility has been located and designed to provide the best possible emergency radio coverage to a large portion of Redmond and surrounding communities while also not obstructing area views. A balloon test was conducted in July 2016 which shows that the tower will only be visible from a few locations in the neighborhood. Please let me know if you would like me to e-mail and/or mail you a copy of the photo simulations.

Concern #3

Aware that emissions are below FCC standards but with already so many radio waves, why add more. Do not want to risks kid's health for unnecessary city expenditures.

Response #3

The proposed King County PSERN emergency communication facility will not pose any health risks to the community. A detailed report regarding the specific emissions from this facility is available. Please let me know if you would like me to e-mail and/or mail you a copy of the report.

Please let me know if you have any other questions and/or concerns about the project.

Respectfully,

Sarah Telschow (King County PSERN Agent/Representative)

King County PSERN Education Hill - Survey

King County Puget Sound Emergency Radio Network (PSERN) approached the City of Redmond about the possibility of placing a 170' emergency communications tower and equipment on the public works/water tank property located at 10365 172nd Ave. NE in the Education Hill neighborhood. Before making a decision, the City of Redmond requested a survey to assist in determining if the neighborhood would be supportive of an emergency communications facility being placed on the public works/water tank property.

A self-addressed stamped envelope has been provided. Please mail the completed survey back as soon as possible. **Please return the survey by July 25th.** (Please note survey responses are anonymous unless contact information is provided).

- 1) Have you heard or are you aware of the PSERN levee that was passed by King County voters on April 28th, 2015, for funding and upgrading the current emergency radio system? Please mark one (1) box below.

Yes
 No

- 2) Would you be supportive of a PSERN emergency communications tower and equipment to provide expanded emergency communications, as depicted and described in this mailer, being installed at the property located at 10365 172nd Ave. NE?

Yes, Supportive
 No, Not Supportive
 Unsure

Please provide comments:

You have not provided how strong the emission of electromagnetic wave from the tower.
we bought a house on the Education Hill because it is far enough from the power line to receive less impact.
We concern about health problems from the strong electromagnetic waves from the tower.

3) Do you like the proposed design (170' monopole) as seen in the provided photo simulations and demonstrated at the scheduled balloon test on **Saturday, July 16th between 9 am and 11 am?**

- Yes, Supportive
- No, Not Supportive
- Unsure

Please provide comments:

It is too close to schools where children spend long hours. They should not be exposed to the strong electromagnetic waves.

4) Please outline any specific questions and/or concerns that you have about the proposed PSERN emergency communications installation:

Please provide comments:

you need to show how much the tower emits electromagnetic waves, and include the information on health effect to the public.

5) Please provide contact information. **(Please note survey responses are anonymous unless contact information is provided)**

Re: King County PSERN - Education Hill - Survey

August 11, 2016

Dear Yuka:

Thank you so much for taking the time to complete the survey regarding the proposed King County Puget Sound Emergency Radio Network (PSERN) emergency communications facility for Education Hill located at 10365 172nd Avenue NE Redmond, WA.

The returned survey had a few questions/concerns outlined. The questions and concerns were as follows:

Concern #1

Health problems from emissions.

Response #1

The proposed King County PSERN emergency communication facility will not pose any health risks to the community. This King County PSERN facility adds reliability and allows for improved critical emergency radio communications to reach and coordinate with emergency responders.

Concern #2

Too close to the schools.

Response #2

The proposed facility has been located and designed to provide the best possible emergency radio coverage to a large portion of Redmond and surrounding communities. This area is underserved by the current emergency radio network and is a known hazard to our first responders. The proposed facility is located as far as possible from the surrounding schools.

Concern #3

How much the tower emits and provide this information on the health effects to the public.

Response #3

A detailed report regarding the specific emissions from this facility is available. Please let me know if you would like me to e-mail and/or mail you a copy of the report.

Please let me know if you have any other questions and/or concerns about the project.
