Hi Jozanne,

I would be okay with them cross thing that off. What are your thoughts?

Thanks,

Cameron Zapata // Planner

Hi Cameron,

Regarding your comments on the Origins Tenant Improvement project, this existing building is currently unheated with a simple sliding barn door assembly-which would not be appropriate for a retail establishment. Is it acceptable to simply cloud the exterior storefront portion of work and identify it as "work to be done under a separate permit"? The reasons for this are that energy calculations needed to be completed based upon this design. If you have the time to discuss this please contact me.

Thanks,
Tom
