Redmond Pool Improvements
Begin this Summer

The Redmond Pool will receive the first phase of essential improvements this summer, beginning at the end of June, and extending into September. These improvements will result in better air and water quality, energy efficiencies, operational savings and help preserve the pool for another 25 to 30 years.

After 47 years, the pool systems have outlived their useful life, and improvements to the pool are necessary and critical to the future use of the pool as a community space.

Repairs and improvements will occur in two phases over two years

Phase I: Summer 2019
- Replacement of mechanical systems
- New air handling units
- New boiler systems
- New electrical, roof and windows
- Improved pool circulation

Timeline: Begins 6/24 and ends early fall. The Redmond Pool will close during this time.

Phase II: 2020
- Locker room and lobby enhancements
- New pool decking
- Improved ADA access

Timeline: A timeline will be determined at the end of 2019, and may not require a pool closure.

A Splash of History

1972
The Redmond Pool was built by King County using Forward Thrust bond funding.

2010
The Redmond Pool was officially transferred to City of Redmond.

2010-2017
Regular mechanical system failures occurred, with replacement parts difficult to find due to the age of the pool.

2016-2017
Community outreach identified aquatics as the top priority for community center services.

2017
City of Redmond conducted an energy audit of the Redmond Pool. The pool was found to be structurally sound, and improving the pool was the most cost-effective approach.

2018
City Council adopted the 2019-2020 budget, approving $8M to improve essential and high priority systems.
Construction begins June 24 and will be completed by fall 2019. The pool will close during this time.
