PARTICIPATE IN MAJA PETRIĆ'S ARTWORK AIEye on Redmond

Maja Petrić invites the Redmond community to participate in the creation of her final art piece during her Artist-In-Residence at the City of Redmond. Maja will be using artificial intelligence system **AIEye**, developed in collaboration with computer scientist Mihai Jalobeanu, to create an image that expresses the essence of community's gaze at Redmond's natural environment.

To achieve an all-encompassing view that people have of nature in Redmond, Maja will need thousands of images that document the manifold of people's gaze at the natural landscapes of Redmond. For this, **Maja invites the Redmond community to participate in creation of the piece by contributing their own captures of Redmond's nature.**

The AIEye system will be used to create one image that represents all the collected images from community's and Maja's documentation of the environment. For more information about AIEye, visit Maja's page about *Lost Skies* <https://www.majapetric.com/lost-skies> for which AIEye system was developed. To view Maja's up to date artwork that uses AI to create art, visit her gallery at *16528 Cleveland St., Building D in Redmond.*

The final piece AIEye on Redmond will be donated to the City of Redmond and permanently exhibited by the City.
